12. Chief Procurement Officer's comments:  
Approval granted with the understanding that the department responded to a situation that was unforeseen and unanticipated when the force main collapsed after heavy rain/storm, eroding the sandy backfill materials exposing the footing of a huge retaining wall, water line, sewer line, drain lines and fiber optic cables. According to the department, immediate action to respond to deteriorating underground facilities was necessary to protect the safety of the public on a main highway. If the situation was not addressed, the health and safety of the public would have been seriously threatened. Through telephone conversation with Mr. Ferdinand Cajigal and SPO staff, the department plans to investigate other areas potentially at risk. Once determined, need(s) shall be procured using the appropriate method of procurement. This award is required to be posted on the Awards Reporting System.
